

TOP CLEANER POLY

Year-round Performance for Multispan Greenhouses

Designed for efficient cleaning of plastic multispan greenhouses, the Top Cleaner Poly restores maximum light transmission, helping improve crop growth and yield.

A versatile solution, it moves along the gutter while hydraulic brush arms clean both sides of the roof. Optionally it can be equipped with spray bars for the precise application of a protective coating.

One machine, year-round performance. A reliable and safe way to clean, coat, and maintain greenhouse roofs with maximum efficiency.

Easy to Lift on the Greenhouse.

Fully Detachable Arms.

Soft Support Roller.

Arms suitable for any Roof Size.

Hydraulic Brushing Discs.

Specialist in machines for cleaning and maintaining greenhouses, based in The Netherlands.
